

## Venue & Date

Lecture Hall of the  
Bundeswehr Medical Academy  
Neuherbergstr. 11  
80937 Munich/Germany  
October 25-28, 2011

## Conference Chairperson

Col Prof. Dr. Lothar Zöller  
Bundeswehr Institute of Microbiology  
Neuherbergstr. 11  
80937 Munich/Germany

## Conference Secretary

Col Prof. Dr. Hermann Meyer, DVM  
biodefense2011@bundeswehr.org  
Phone: +49-89-3168-3910

## Scientific Committee

H. Meyer  
G. Dobler  
S. Schmoldt  
H. Scholz  
W. Splettstößer  
R. Wölfel  
L. Zöller

## Industrial Exhibition

The conference will be accompanied by an industrial exhibition to be organized by the German Society of Military Medicine and Pharmacy.

## Conference Language

The official conference language will be English.

## CME Points

The conference will be registered by the Chamber of Physicians of Bavaria.

## Accommodation

A limited number of military standard rooms will be available on the premises of the Bundeswehr Medical Academy. The rooms will be distributed with priority to participants from military and governmental organizations, but other attendees are also welcome to apply.

Limited numbers of rooms offered at special conference rates have also been reserved in various hotels and can be booked by registered participants stating their registration code. Further details are provided on the conference website.

## Travel & Transfer

Travel and transfer information is provided online on the conference website.

**Biodefense  
Conference**

October 25-28, 2011  
Munich, Germany

organized by

the Bundeswehr  
Institute of Microbiology  
in cooperation with

the German Society of Military  
Medicine and Pharmacy

Dear Colleagues,

It is a great pleasure for me to announce the upcoming Medical Biodefense Conference 2011 and to cordially invite you to join the event. For the thirteenth time now, this meeting will be held under the auspices of the Bundeswehr Institute of Microbiology in the Bundeswehr Medical Academy in Munich. And, as in 2009, the German Society for Military Medicine and Pharmacy will stage an accompanying industrial exhibition. The premiere of our new conference concept has proved very successful, and the appreciation by the audience has encouraged us to push this traditional meeting up to a high-level scientific conference.

To attend the Medical Biodefense Conference has now become a must for biodefense researchers. The meeting is unique in focusing on the medical aspects of the subject. It will offer an excellent opportunity to meet civilian and military researchers from all over the world and to pick up information on the latest developments and products in the fields of diagnosis, therapy and prevention of diseases caused by dangerous pathogens as well as the latest protection technologies.

Besides agent-related sessions like "100 Years of Research on Francisella", the Medical Biodefense Conference 2011 will address most relevant cross topics such as mobile reconnaissance, new threats, or the pipeline of new drugs, new targets and new vaccines. There will also be special workshops featuring the latest developments in bioforensics or novel diagnostic applications.

Not to mention that Munich, the capital of the state of Bavaria, is an attractive place to meet! The Conference social event will let you taste the charm of Bavarian atmosphere.

There are definitely a number of good reasons not to miss the Medical Biodefense Conference 2011. We look forward to another outstanding scientific event in Munich and to seeing you there as a participant or exhibitor.

Sincerely,

Prof. Dr. L. Zöller, Colonel  
Conference Chairperson

## Scientific Program

### Tuesday, 25th October

Registration

### Wednesday, 26th October

Opening ceremony

Plenary sessions

Workshops

Satellite symposia

Industrial exhibition

### Thursday, 27th October

Plenary sessions

Workshops

Satellite symposia

Industrial exhibition

### Friday, 28th October

Workshops

Closing Ceremony and Poster Awards

Farewell

## Social Program

### Tuesday, 25th October

Get-together reception

### Wednesday, 26th October

Bavarian Evening in one of Munich's famous  
brewhouses

## Main Topics

- 100 Years of Research on Francisella
- Bioforensics
- Biothreats Associated with Climate Change
- Deployable Laboratory Facilities and Outbreak Investigation Teams
- Emerging Infections
- Epidemiology and Surveillance
- Intracellular Agents
- New Drugs
- New Targets for Antiinfectives
- New Threats
- Novel Diagnostic Applications
- Outbreak Investigation
- Plague
- The Pipeline of Antiinfectives and Vaccines against BT Agents

## Conference Website

Please refer to the conference website  
[www.biodefense2011.org](http://www.biodefense2011.org)

for more detailed information. [Registration](#) and [abstract submission](#) will be open from 1st March. The deadline for registration will be 15th September, abstract submission will be closed on 15th August.
